## About Me

As a driven and rigorous engineering graduate, I am excited to launch my career in the field of Computer Science. I'm eager to learn more and experience the real-world challenges. Known for my attention to detail and ability to work efficiently in teams. I'm excited about the opportunity to bring passion and expertise to a forward-thinking organization

## Skill set

- Python
- C
- Java
- HTML, CSS
- Figma
- Unity
- Adobe illustrator
- Prototyping and wireframing

## Soft Skill

- Problem solving.
- Communication : Proficient written and verbal in English.
- Team work and collaboration.
- Taking Ownership.
- Self Motivated.
- Multi tasking.

## Education Background

- Bachelor of Engineering under the domain of Computer Science and Design (in progress) with **8.27 CGPA** (upto 4th semester) at Kongu Engineering College, Perundurai, Erode.
- Higher secondary certificate (HSC) with **90.68%** at The Modern Academy Matric higher secondary school, Namakkal.
- Secondary school leaving certificate (SSLC) with **85.4%** at same school.

## My Projects

- An **Online Meat Ordering** platform designed with HTML and CSS for a seamless and user-friendly experience.
- A comprehensive **Hospital Management** system crafted with HTML and CSS with user-centric functionality.
- A personalized **Portfolio** website showcasing my skills and achievements, elegantly designed with HTML and CSS for a professional and engaging online presence.
- Created an immersive Augmented Reality application called **AR Pipes and Circuits** using Unity.
- Done a project of **WhatsApp clone** with exact design and interactions using the tools of figma.
- Done a project named as **Civil Sites** as a part of my semester activity using figma.
- Completed a food delivery app named as **HungryBox** using the tools of figma.
- Completed a brief advertisement of the **Toyota Cars** with interactive design using figma
- Currently doing the UI of the own app named as **HealHub** in figma. (in progress)
- Practicing user interface design as **Daily\_UI** in figma.

## Funded projects

- **KEC BusNotify** - Done a IoT project based on the signal transmission to get notified for waiting of students in bus stand.
- It was funded by **TBI@KEC** - Rs. **30,000/-**
